EDUCATION

UNIVERSITY OF RWANDA **Kigali, Rwanda**
Bachelor of Applied statistics *October 17,2025*

- Concentration in Economics

SKILLS SUMMARY

- **Languages:** R Programming, SQL
- **Frameworks:** R Shiny
- **Tools:** Stata, Microsoft Excel (Advanced), Power BI, Tableau, KoboToolbox
- **Platforms:** RStudio, Power BI Service, Tableau Public, Google Workspace, Microsoft Office Suite
- **Soft skills:** Analytical thinking, problem-solving, data storytelling, stakeholder communication, research mindset, attention to detail, adaptability, teamwork, time management, ability to translate complex data into actionable insights

WORK EXPERIENCES

Rama Consult | Link **Kigali, Rwanda**
Business Analyst *Jan 2026 – Present*

- Institutional Capacity Building: Lead the delivery of advanced technical training for early-career professionals and institutional stakeholders in R, Power BI, SQL, and KoboToolbox, bridging the gap between raw data collection and strategic visualization for digital transformation.
- Strategic Research & Analysis: Architect and support applied research projects focused on solving national-level challenges in Rwanda, managing the end-to-end pipeline from mobile data collection to high-level executive reporting and business valuation.
- Data-Driven Transformation: Translate complex analytical concepts into accessible data products and learning frameworks, significantly improving stakeholder data literacy and the adoption of evidence-based decision-making in management consulting.
- System Optimization: Design and implement automated data structures and institutional tracking systems to ensure data consistency, accuracy, and regulatory compliance across multi-sectoral research and investment initiatives.
- Consultancy & Strategy: Provide data-backed recommendations for market research and strategic planning, helping clients align their vision with actionable, technology-driven roadmaps for sustainable growth.

EduConnect Rwanda | Link **Kigali, Rwanda**

Facilitator, Ai Enthusiast & Data Scientist *Sept 2022 – Nov 2025*

- Delivered hands-on training in data analysis, statistical software, and visualization tools (R, Excel, Power BI and KoboToolbox) to students and early-career professionals.
- Supported applied research projects addressing real-world challenges in Rwanda, from data collection through analysis and reporting.
- Translated complex analytical concepts into practical, easy-to-understand learning materials, strengthening stakeholder understanding and adoption.

IPAR RWANDA | Link **Kigali, Rwanda**

Researcher & Data Analysis *July 1, 2024 – September 20, 2024*

- Performed data cleaning, visualization, and statistical analysis to support research projects.
- Contributed to report writing by providing insights from data trends and analyses.
- Assisted learners with applied problem-solving, assignments, and data interpretation.

Travels Insiders Consultant TIC **East Africa**

Graphic Designer & Multimedia Content Creator *January 2020 – September 2024*

- Led design of marketing materials including flyers, posters, banners, infographics, and advertising visuals.

- Produced static and dynamic content for social media campaigns and promotional initiatives.

- Managed content formatting and visual storytelling optimized for digital platforms.

PROJECTS

NISR Big Data Hackathon | Link **November 21 2025**

- *Conducted in-depth analysis of Rwanda's export data to identify performance trends, risks, and growth opportunities.*

- *Built predictive models using machine learning techniques to forecast export performance over a 10-year horizon.*

- *Designed and deployed an interactive R Shiny dashboard, integrating AI-assisted insights and GIS-based visualizations to present export destinations and strategic opportunities.*

- *Delivered data-driven recommendations in a clear and decision-oriented format suitable for policymakers and non-technical stakeholders.*

UBUZIMA INTELLIGENCE SYSTEM | Link **March 19 2026**

- *Built a national-scale AI-powered healthcare platform that enables patients to book appointments, receive digital approvals, and access hospital services efficiently, reducing queues and improving time management.*
- *Designed and implemented a real-time system integrating patient data, hospital workflows, and AI consultation, supporting symptom analysis, triage, and healthcare guidance.*
- *Developed a scalable full-stack application using Firebase (Authentication, Firestore, Cloud Functions, Storage) with secure role-based access for patients, hospitals, and national administrators.*
- *Engineered advanced features including AI-driven document generation, image/document analysis, and a live geographic dashboard with Rwanda map visualization for healthcare insights.*
- *Created a modern, responsive UI/UX with strong branding, professional design, and high-performance architecture, aligned with real-world digital health transformation goals similar to national systems.*

IMPACT OF AI IN EDUCATION(R Programming) | Link **September 16 2024**

- *Predictive student performance modeling*
- *Educational trend analysis*
- *Data-driven insights*
- *Machine learning algorithms*
- *Interactive visualizations*

POWER BI STORE SALES DASHBOARD | Link **December 31 2025**

- *Regional sales performance analysis (Central, East, South, West*
- *Category and sub-category sales breakdown*
- *Profit and quantity tracking by order date*
- *Shipping mode performance comparison*
- *Interactive visualizations*

CERTIFICATES

- Data science with R Programming | **CERTIFICATE** **Apr 2024**
- NISR Big Data Hackathon Participation **|** **CERTIFICATE** **Dec 2025**
- Managing Data with Microsoft 365 | **CERTIFICATE** **Sept 2025**
- Ai Foundation | **CERTIFICATE** **Aug 2025**
- Advanced Excel Formulars | **CERTIFICATE** **Apr 2024**
- Essentials of data visualisation using Exel **|** **CERTIFICATE** **Apr 2024**
- Certified Teaching Assistant – IEE Rwanda | **CERTIFICATE** **June 2022**
